## Summary

I'm a multidisciplinary designer and front-end developer passionate about blending creativity with code to craft visually engaging and user-focused digital experiences.

With a foundation in Adobe Photoshop and CorelDRAW, I specialize in high-end imagery, vector graphics, and signage design. My front-end skills extend to responsive UI development, interactive elements, and intuitive layouts that bring ideas to life on screen.

## Experience

### Graphic Designer

Prinbest Technologies

2017 - 2024

- **Concept Development:** Collaborating with clients or internal teams to understand design briefs and develop creative concepts tailored for print.
- **Design Creation:** Producing layouts for brochures, flyers, business cards, packaging, banners, and other printed materials using tools like Adobe Photoshop and Corel Draw.
- **Proofing & Prepress:** Reviewing and proofreading designs to ensure accuracy in layout, color, and dimensions before sending them to print.
- **Mockups & Revisions:** Presenting design mockups for feedback and implementing revisions based on client or team input.
- **Print-Ready Files:** Preparing final artwork that meets technical printing standards (e.g., CMYK color mode, bleed settings, resolution and color separation for offset printers.).
- **Quality Control:** Supervising the printing process to ensure consistency, color accuracy, and adherence to brand guidelines.
- **Trend Awareness:** Staying updated on design trends, printing techniques, and materials to enhance output quality and creativity.
- **Repairing Hp and Canon Printers:** repairing printers and photocopiers at work such as replacing drums, blades, fuser films, and general related connections.
